Signage solutions, dvLED displays, Professional TVs and more

Better business vision with Philips Professional Displays

Quality and versatility are just the beginning. Innovation and power come as standard. Total solutions from PPDS – designed for maximum impact and return on investment.

Over 40 years of experience working across the industries with small businesses through to global enterprises has enabled us with the insight and the expertise to develop breakthrough technologies. Brought to market when and where the are needed – from world-first, sustainability-focused new technologies, cutting-edge professional TVs, through collaboration-focused interactive displays, smart signage and videowalls, to limitless direct view LED displays. The full range is here to discover with Philips Professional Displays.

Tailored tech solutions for better business
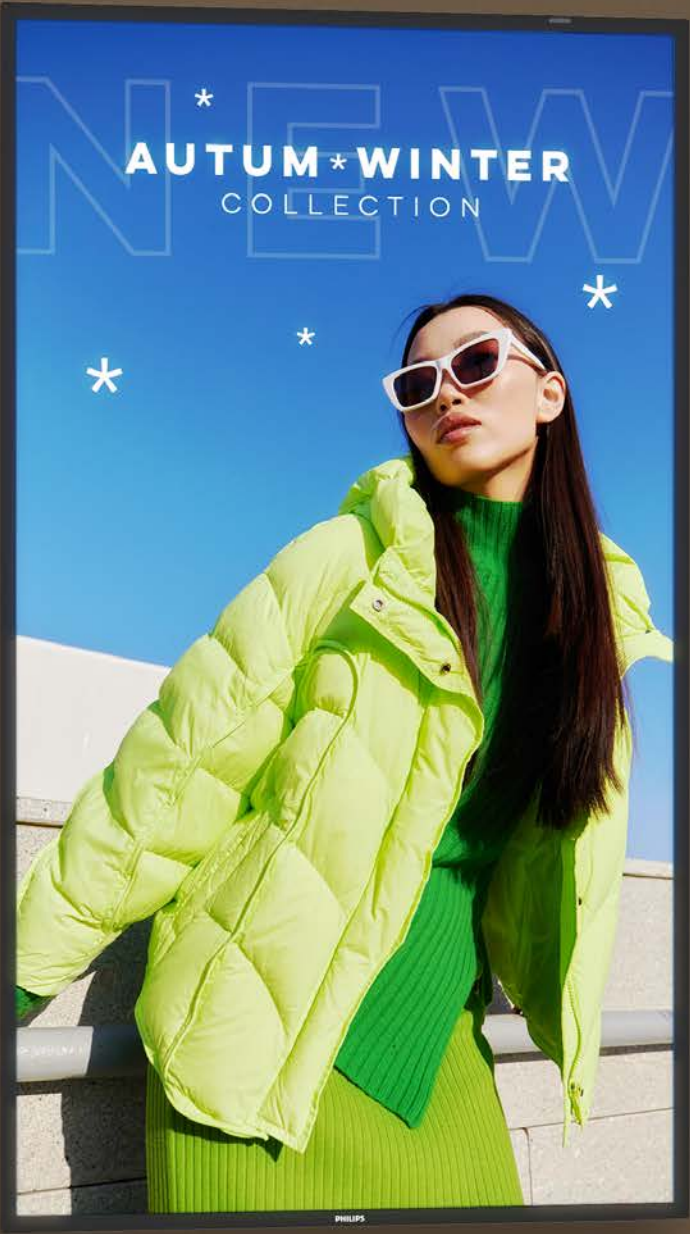

Signage collection

Crisp colour and ultra-clear resolution bring content to life for flawless engagement and better results. Built for versatility and packed with features that can be easily adapted for your usage needs.

Interactive range

Inspire collaboration, maximise engagement and empower true connections between people and your content. All featuring super smooth multi-touch functionality and powerful business features.

Videowall array

Size up for an unforgettable bigger picture. Turn your content into an immersive and customised visual feast. Bring dynamic content to life with added intrigue and real radiance.

Direct view LED line up

Display content as its meant to be seen. Adaptable and flawlessly flexibile, build out captivating small corners, show vibrant content in shop windows, and engaging masterpieces in larger-than-life detail.

Professional TVs portfolio

Deliver the ultimate home-from-home experience for hotels, healthcare settings and beyond. Designed on our Android TV platform for smart familiarity, cutting-edge versatility and maximum engagement.
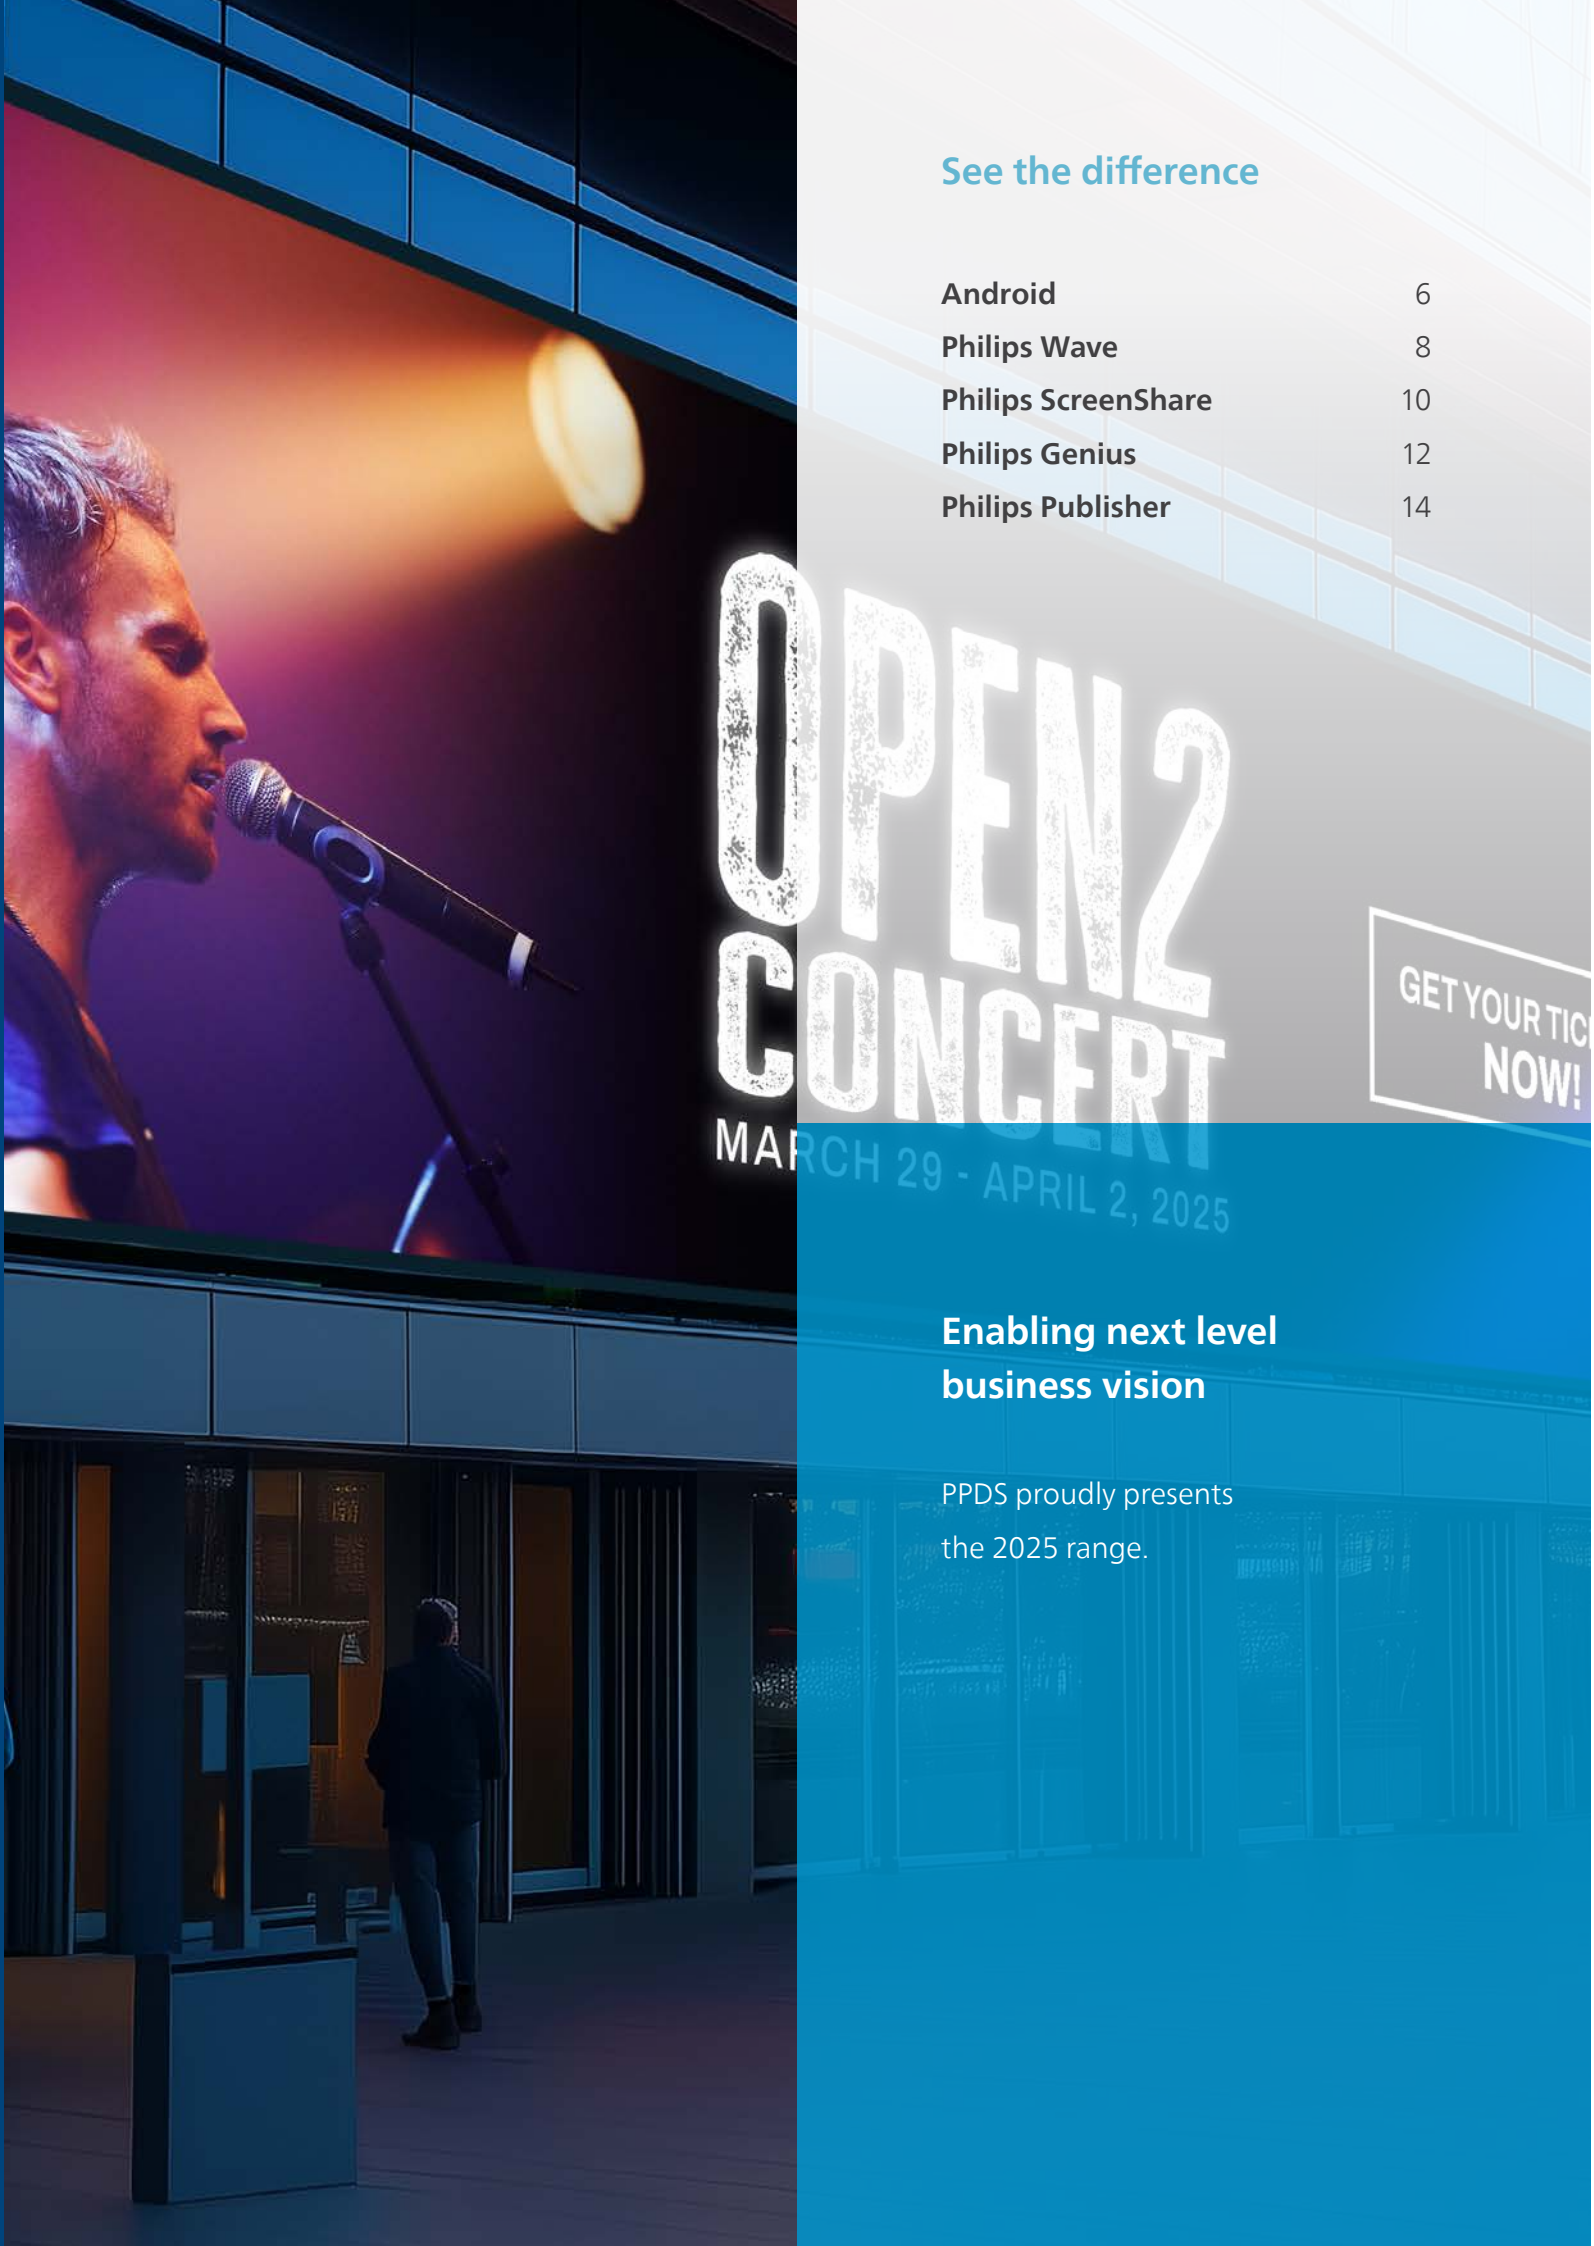

See the difference

Enabling next level business vision

PPDS proudly presents the 2025 range.

Meet the products

Android™

Secure, non-rooted SoC built-in

The operating system is one of the most important elements on any device, providing a stable and secure environment for applications to perform tasks. Choosing a display solution with an integrated Android operating system offers a competitive edge – cost-effective and with a wide range of software possibilities.

Philips Professional Displays with an integrated non-rooted Android SoC are designed for professional settings, delivering flexible and agile content management and system security.

Infinite possibilities for better business

Whether on digital signage or an Android TV*, engage, inform and create with ease. When you choose a Philips Professional Display that is powered by Android, you will gain infintite possibilities.

With intuitive access to millions of apps from the Google Play store, you will also be able to connect your tailor-made apps and software for a truly unique customer experience.

Powered by

Android

*Android TV and Google Play store are only available on Philips B-line series

Do more with Android

Give customers more ways to enjoy time in front of your displays.

Make a positive impression as a techforward company enabling tailored experiences.

Enjoy better connectivity with your existing systems without additional costs.

Open-source design allows you to create custom apps for any purpose.

Secure updates keep your Google-certified products up-to-date, optimised and protected.

Philips Wave

Your evolutionary cloud platform unlocking the power, versatility and intelligence inside Philips Professional Displays. Made for and in collaboration with system integrators.

## State-of-the-art remote device management

Philips Wave is the evolutionary cloud platform, dedicated to bringing secure and scalable, sustainable bottom line benefits for business.

Integrating different types of hardware can be challenging, Sending service technicians is costly. And displays are not always accessible. Philips Wave puts you fully in control with simplified installation and display set-up, including managing, monitoring, and controlling displays, upgrading firmware, managing playlists, and setting power schedules. Allowing you to save time, energy and environmental impact.

## Your display solution for a sustainable future

In a world where resources are precious and overheads are rising, the ability to avoid costly onsite interventions and manage displays efficiently is no longer just a nice-to-have… it is critical.

With Philips Wave you can be proactively alerted to issues, helping you to avoid costly truck rolls, saving time and energy, while reducing your carbon footprint, too. Wave also offers options to optimise your fleet's energy usage – for instance by scheduling standby when a display is not in use.
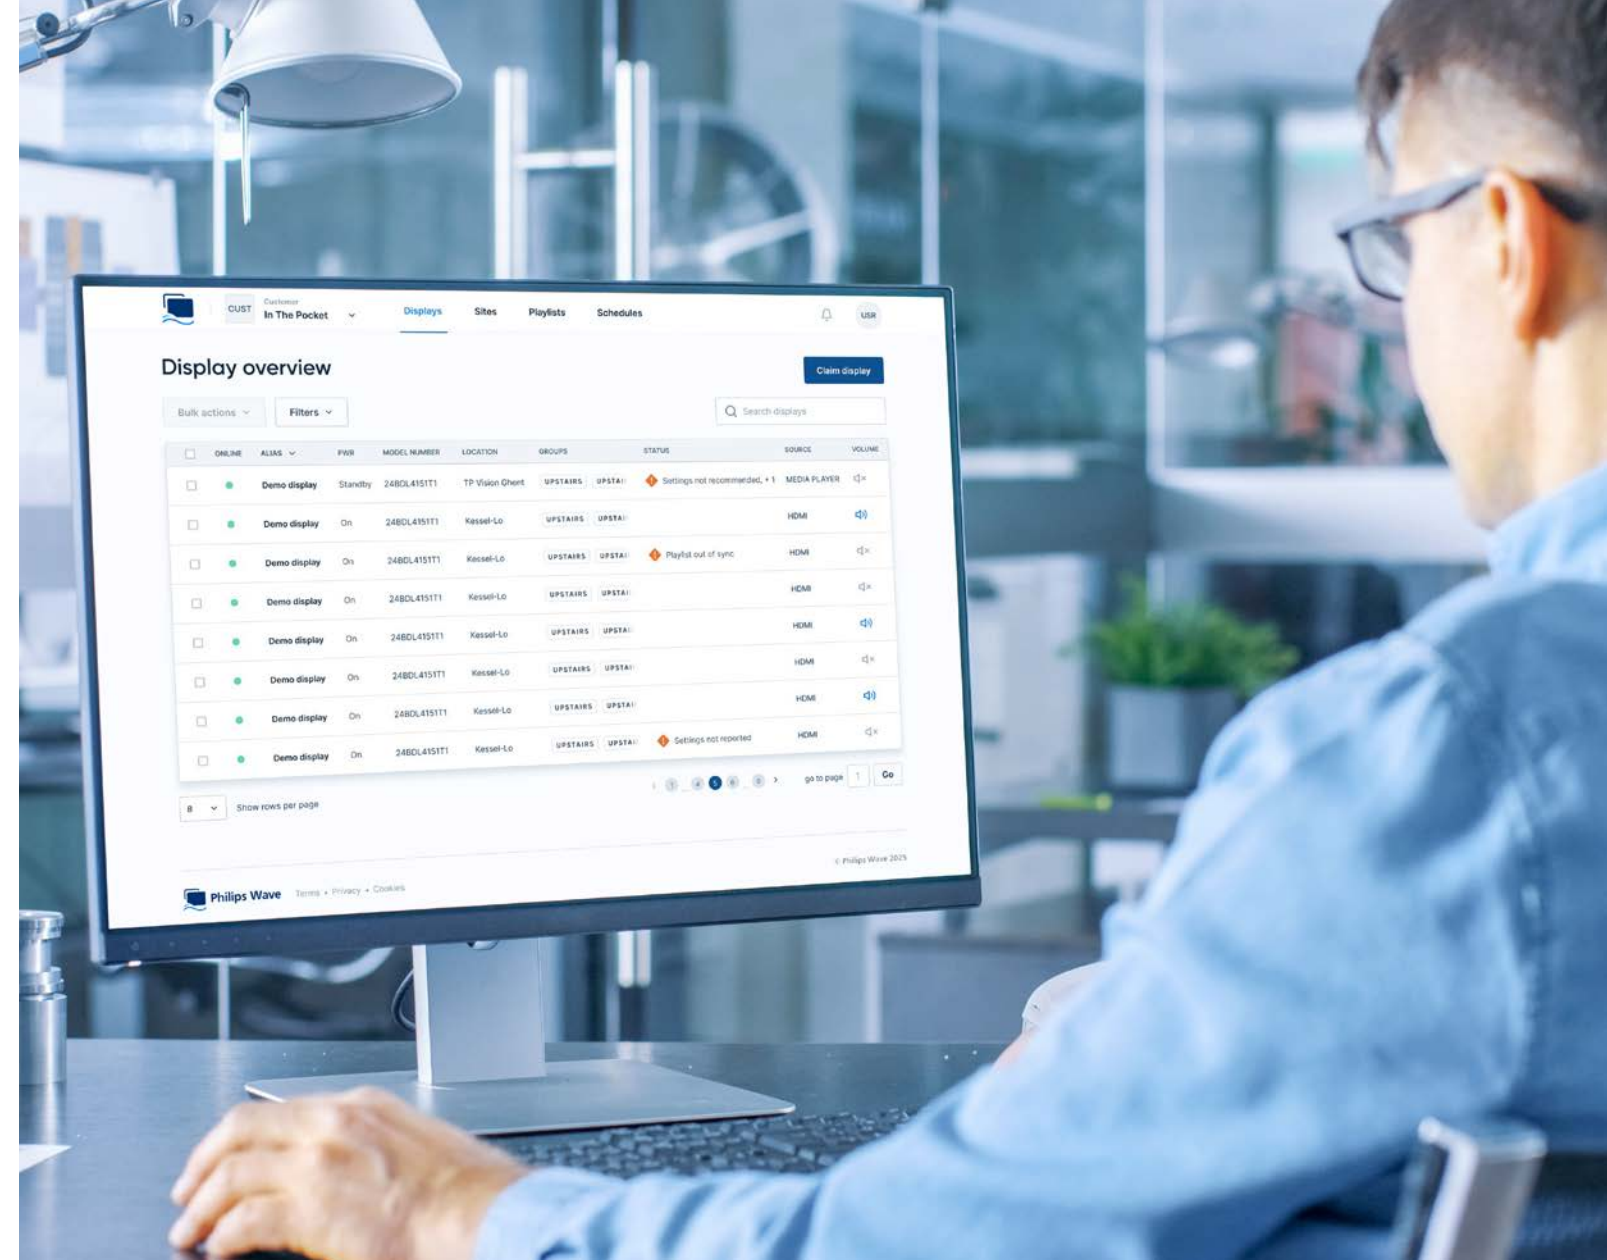

What is Philips Wave?

- Scalable
- Future-proofed
- Secure and easy-to-use
- Easy-to-integrate (API first)
- Continuously developing and evolving

Philips Wave

Your evolutionary cloud platform unlocking the power, versatility and intelligence inside Philips Professional Displays. Made for and in collaboration with system integrators.

An essential application for your daily workflow

- Manages your displays proactively and remotely
- Works with different display hardware and generations so you can focus on innovation and not compatibility
- Reduces the need for onsite display interventions and costly truck rolls
- Allows you to proactively service displays without interruptions or travelling to site
- Enables you to scale integrations with a cloud native solution.

Philips ScreenShare

Wireless content sharing made easy

Your secure, one-stop content sharing software solution

Welcome to Philips ScreenShare – the presentation software solution that allows presenters and participants to wirelessly share the content on their own devices onto the main display. Whether educators and students, or business meeting participants, content sharing with Philips ScreenShare is easy, secure, and requires no additional hardware at all.

Connecting directly from any device

With Philips ScreenShare, attendees can share from any device and operating platform, whether from web browser, Windows, Mac, iOS, iPadOS, ChromeOS, or Android. The display manager can give control to the meeting organiser, allowing them to connect and choose which presenters can share the content of their own devices onto the main screen.

How Philips ScreenShare works
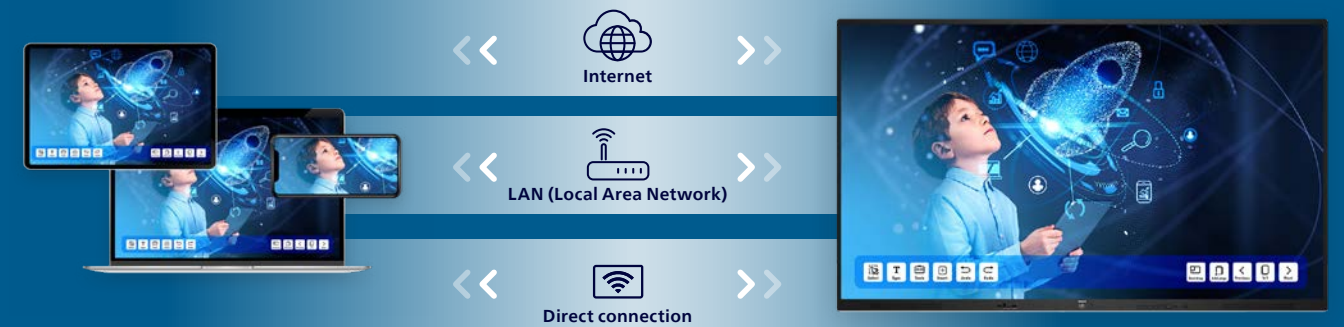

Highlights and key features

Freedom to teach
Wireless screen sharing means that educators can teach from the front of the classroom, at their desk or around the room. They can focus on what's important and let the technology in the room do the heavy lifting.

Saving shared content
With Philips ScreenShare, the content presented during a meeting or class can be saved for connected users to upload as well. The shared items folder acts as a central repository for files and links shared during the session.

File types supported include:
Audio mp3, wav	**Image** jpg, png
Document doc, docx, xls, xlsx, ppt, pptm, pptx, ppsx, txt, odt, ods, odp	**PDF** pdf
	Video avi, mov, mp4
	ZIP zip

Connect as a Teacher
The 'Connect as a Teacher' feature allows teachers to use their device to invite connected students and attendees to share their screen.

Whiteboard
Philips ScreenShare can also be used as a whiteboard, enabling greater interactivity and improving the meeting and teaching experience.

Moderator mode
The moderator mode feature gives teachers and presenters the ability to choose, connect, and disconnect the devices that can share onto the main display.

GridView and extended GridView
Using GridView enables four attendees to connect to the display, while extended GridView allows up to nine devices to connect to a session at any one time.

Annotating over content
As well as showing content, the presenter can use the annotation mode to draw and mark, from their device, on top of the content on the display.

Philips Genius

Accelerate teaching with dedicated education software, ready for use wherever, whenever

Bringing true flexibility to teaching and learning

With a purpose to improve people's health and wellbeing through meaningful innovation, the Philips brand is with us through life. Now, Philips Genius brings that purpose into the classroom. Bringing every tool that educators need for lesson planning, delivery, and classroom display activities in one easy-to-access, intuitive, and secure place.

Discover your Philips Genius – Google Classroom compatible cloud-based education software, also available as a local app for Android, Windows and iOS, designed to make life easier for educators and students alike.

Philips Genius at a glance

Intuitive and connected
Secure, easy to navigate, feature rich flexibility for teachers and students, allowing collaboration across devices in the class and elsewhere.

Open to tech
Ready to use on your Philips Collaboration display, and across your existing fleet, including other manufacturers' displays.

Future proofed
Designed by our own dedicated PPDS developers with a commitment to extend and evolve together with education needs.

Highlights and key features

Lesson planning – design ahead of schedule
Fast, efficient, effective and focused – that is surely the plan for every lesson. From the moment the teacher is in front of their students, Philips Genius is the enabler, empowering speed of set up, information retrieval, effective sharing, and focused students.

Bring lessons to life – inspiring students with connected content
With access to a wealth of information, including 3D animations, videos and images, plus the ability to search for and insert images, video and more.

Switching on students and engaging educators with a rich choice of tools
Including a range of easy-to-use tools, with Philips Genius it is simple to explain and demonstrate on the screen – for the class in the room and elsewhere. Pair with your Philips Collaboration Interactive Classroom display for further usability with slick and speedy multi touch for up to 40 fingers.

Working with your connected device – whatever your operating platform
Whether connecting from Android, iOS, Windows, an internet browser, or locally installed, Philips Genius supports multiple platforms to ensure educators and students can connect with ease. Allowing you to import documents, presentations or artwork.

Easy info sharing for all – in the classroom and online
Integrated with Philips ScreenShare, it is easy to share work at the end of lessons. Simply save your annotated lesson and you are ready to go. Ideal for teachers to share with students in the class or anywhere in the world. Ready to add to their OneNote or other curation tool for homework and revision.

Philips Publisher

Intuitive, easy-to-master content creation and control for your Business TV

Philips Publisher is the intuitive app for your own devices, designed to bring you effective and efficient content creation, scheduling and control for your Philips Business TV.

Retail
For independent boutiques and stores, Philips Publisher on your Philips Business TV brings versatile customer communication to your fingertips. Show your latest offers. Work your messaging to the weather. And welcome in your latest ranges with ease.

Food and beverage
Keeping your customers entertained keeps them at your venue for longer. Adapt the messaging around the TV channels you are showing with the easy-to-use templates all ready for you in Philips Publisher. Ensuring they keep coming back for more.

Public venues
From golf clubs and gyms to spas, surgeries, and more, your Philips Business TV brings a versatile display solution to communicate with your customers and keep them entertained. And now you can keep your messaging up-to-the-moment with Philips Publisher.

Healthcare
Whether in the waiting rooms in a hospital, a medical centre or a doctor's, dentist's or optometrist's surgery, making sure patients are comfortable while also providing them with useful healthcare information is easy with Philips Publisher on Philips Business TVs.

Why choose Philips Publisher with your Philips Business TV?

Whatever your industry, providing your customers with relevant and timely entertainment, information, offers and

promotions makes great business sense. Designed with a built-in tuner to allow you to switch them on with the channels of your choice, the Philips Business TV B-Line is your versatile, connected signage solution.

And with Philips Publisher included, you can create, control, push and schedule exciting new content to your TV, easily and intuitively with your own device – whenever you want, wherever you are.

Firmware update is required.
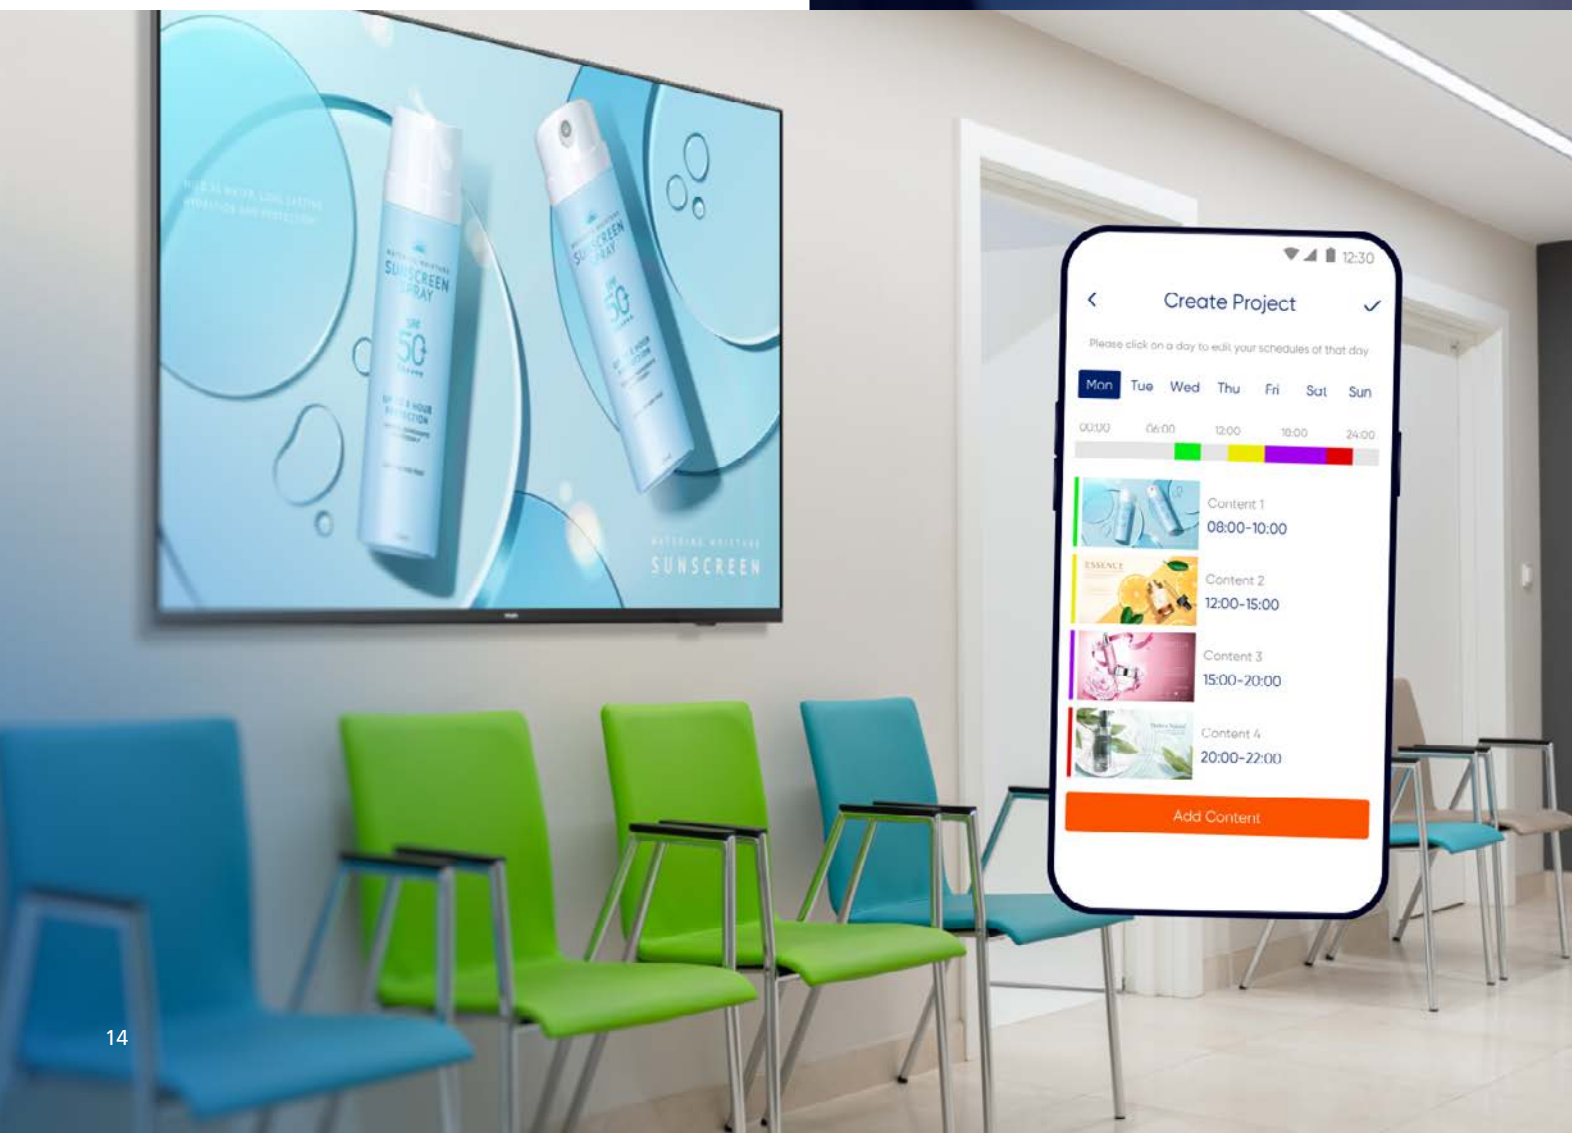

Philips Business TV 2000 B-Line

Professional productivity

Philips Signage
4000 Series D-Line
Captivating innovation

Philips Wave

Powered by Android

Amaze your guests with a smarter, faster signage display. Performance meets versatility in the Philips Signage 4000 Series D-Line - 24/7 and ranging up to 98" in size, it is the perfect choice for content that needs to make a powerful impact in both landscape and portrait orientation. With integrated WiFi and designed for running Android apps, meet the next evolution in signage solutions.

32"	43"	50"	55"
65"	75"	86"	98"
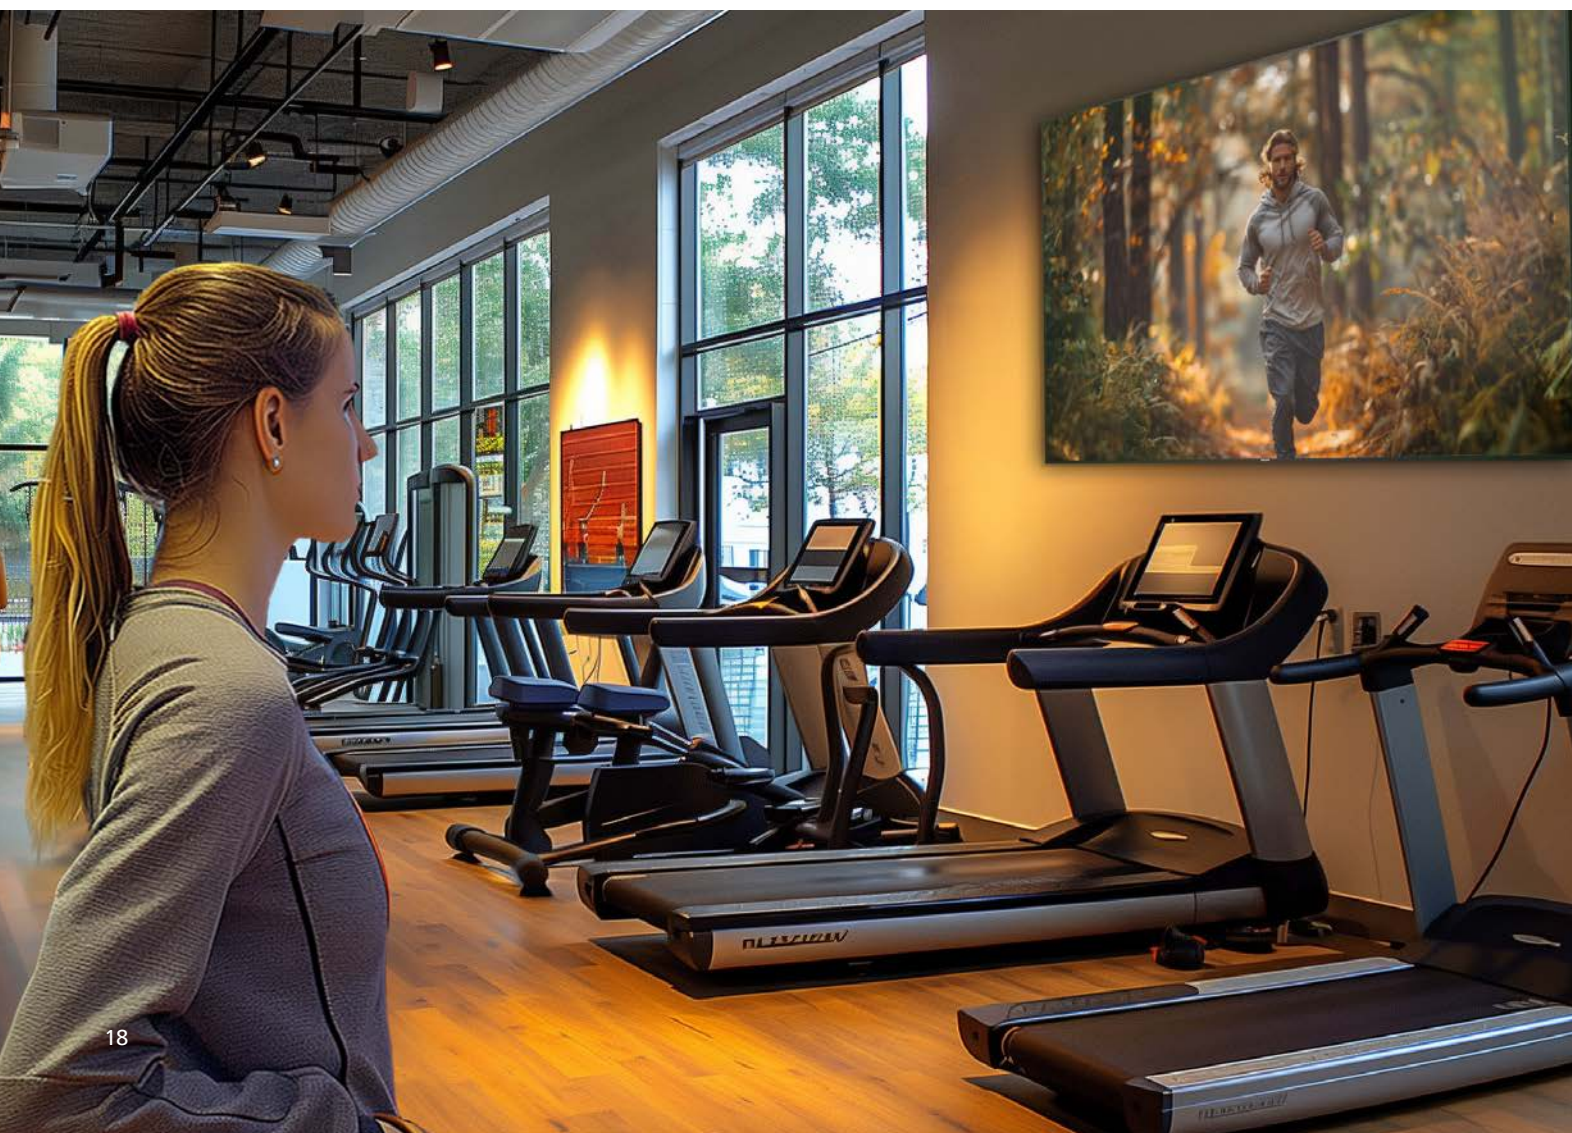

Public venues
Inform and engage visitors in public spaces. The Philips Signage 4000 Series D-Line features an integrated system to communicate with devices over the same network connectivity. FailOver ensures that backup content is played if the primary source experiences an outage.

Retail
Optimise any retail space for a better shopping experience. Easily create and control promotional content across single or multiple displays with Philips Wave, and ensure content is always playing despite primary source outages with FailOver.

Corporate
Easily connect and share content for ultra efficient meetings and presentations. Built-in Android and SmartBrowser provide access to more apps, media content and devices, while Philips Wave allows for updateable internal communications in an instant.

Food and beverage
Easily display menus, update item availability, pricing, and promotions with Philips Wave. Integrated SmartPlayer and internal MemoryCache allow for local content scheduling, while FailOver ensures backup content is always available.

Transportation
Instantly update arrivals, departures, and important announcements with ease using Philips Wave. Built-in Android allows for live information and custom software integration from apps, while FailOver displays backup transport information in case of a primary source outage. All this with 24/7 operation.

* Built-in Android, 4G, and WiFi available on selected models.

Philips Tableaux
Full colour, zero power ePaper technology

Powered by Philips Wave

Philips Tableaux ePaper displays open a new era of signage technology, delivering power-free paper poster replacement opportunities to businesses everywhere. Using zero power to show static images in up to 65,000 stunning, vibrant colours...indefinitely. And needing only super low power to swap to a new image.
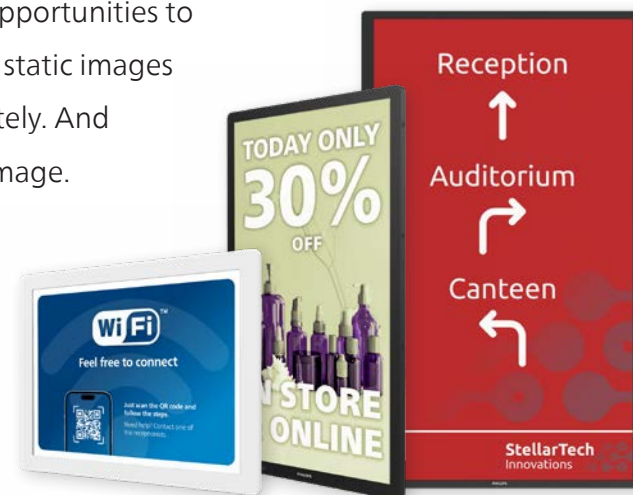

| 13" | 25" | 32" |
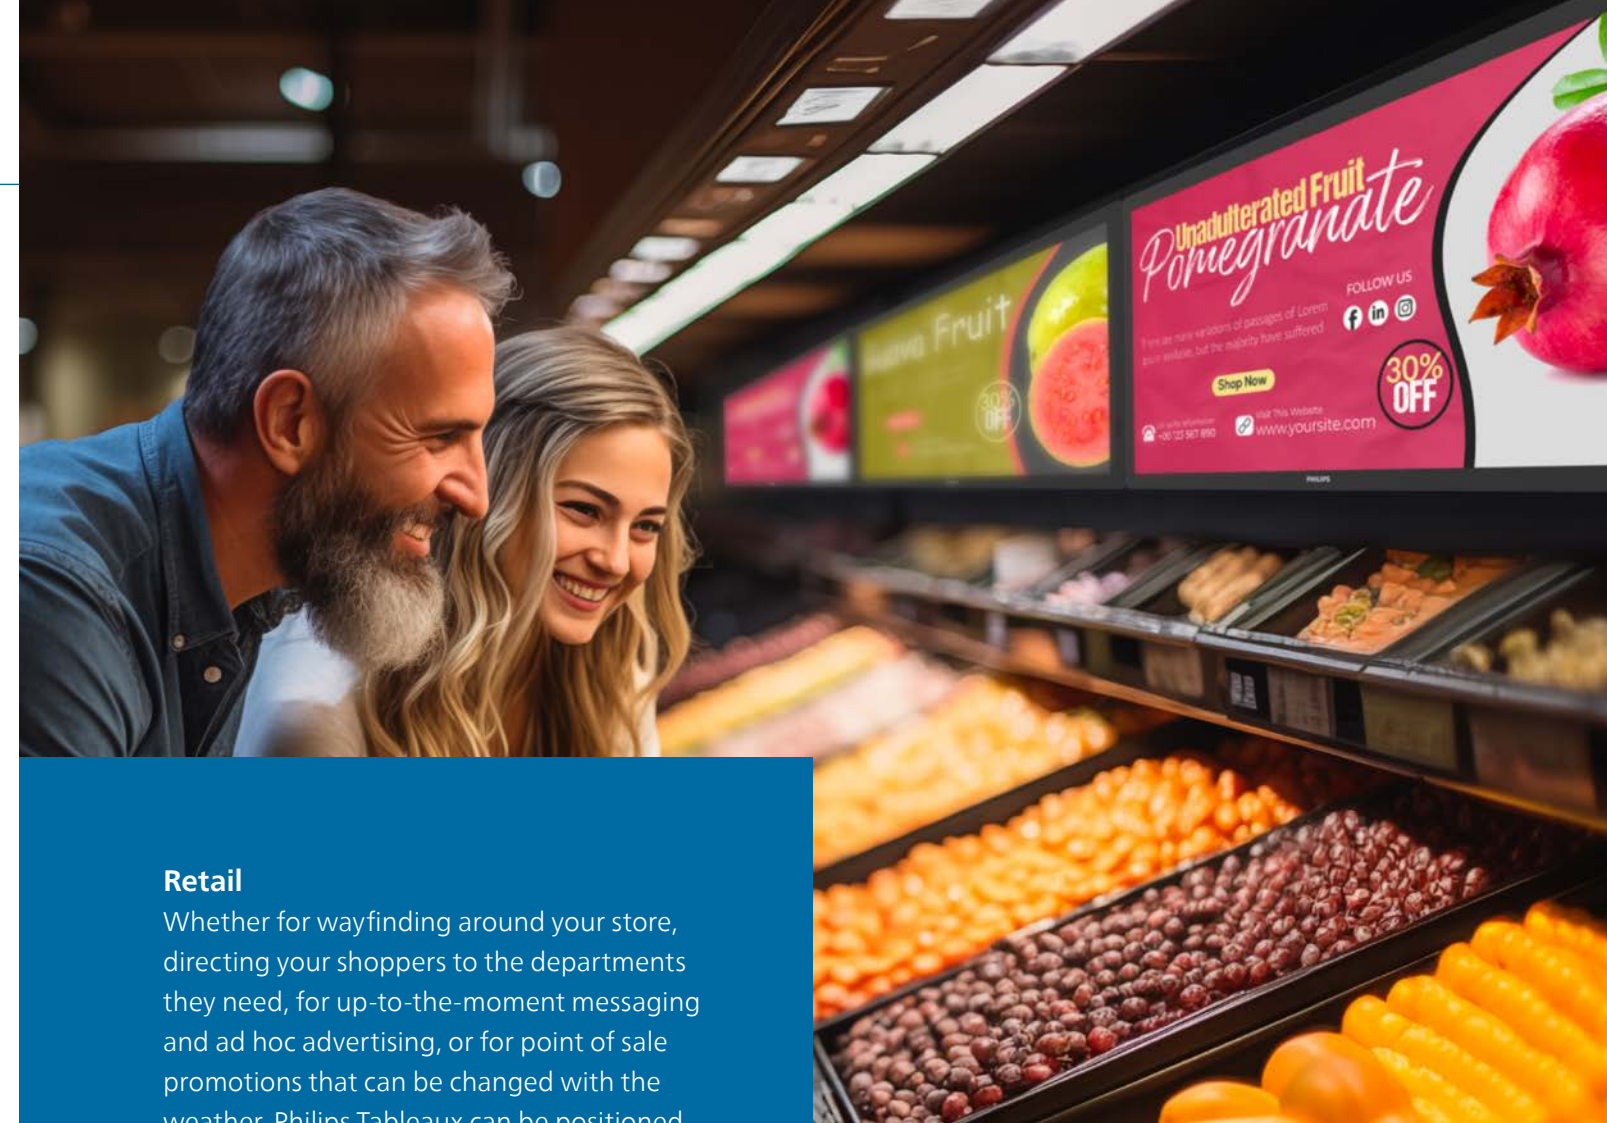

Retail
Whether for wayfinding around your store, directing your shoppers to the departments they need, for up-to-the-moment messaging and ad hoc advertising, or for point of sale promotions that can be changed with the weather, Philips Tableaux can be positioned without the need for access to a power supply, delivering the ultimate in versatility and sustainability.

Food & beverage
Make your menu boards pop with full colour content that can be set for your sittings. Positioned by the entrance of your restaurant, over or on the counter at your cafe, or above the bar in your establishment, Philips Tableaux have no need for a power supply until you need to change the image. A flexible, fuss-free, more environmentally friendly display for your food and beverage business.

Public venues
Showcase a sustainable and eye-catching masterpiece in up to 65,000 colours with Philips Tableaux - ideal for positioning in public venues, including museums, libraries, galleries, theatres, and stadia, with no need for a power supply until you are switching the picture. Deliver information, wayfinding, promotions and more, replacing paper-based displays without wasting natural resources.

Urban LED Outdoor

Philips Urban LED 7000 Series

Outdoor mastery made easy

The Philips Urban LED 7000 Series is perfect for outdoor applications such as bus stations and advertising signs. Focused on high quality visuals, these displays provide vibrant content even in bright conditions. Choose from various pixel pitches, and rest assured with a durable, die-cast aluminium cabinet and IP66 protection for resilience against the elements.

| 28" | 44" |

Transportation

The Philips Urban LED 7000 displays with fine pixel pitches provide exceptional visual quality and high brightness, making them ideal for advertising at bus stations, airports, and train stations. These displays are highly visible even in environments with high ambient light, ensuring that messages, advertisements, and real-time travel information capture the attention of commuters effectively.

Sports Arenas

Elevate the spectator experience by delivering stunning visuals for in-game replays, player statistics, and dynamic advertising. The modular design and fine pixel pitch allow for seamless, large-scale displays with crystal-clear resolution, ensuring that every seat in the arena has a fantastic view, enhancing the venue's aesthetic appeal and versatility. The 7000 series is a centerpiece for fan engagement and revenue generation through targeted advertisements.

Philips Bedside TV
Professional healthcare wellbeing

With Google Cast

Comfort patients with a home-from-home entertainment option with the new Philips Bedside TV. Designed for healthcare environments, this medical-grade 19" display delivers advanced connectivity, a customisable interface, and antimicrobial housing for superior patient protection.

19"

Healthcare

An antimicrobial case minimises the spread of germs and allows for easy cleaning, while nurse-call system compatibility allows easy control of the TV and access to medical assistance from a single device.

CMND enables instant patient information updates, and Google Cast helps keep a comfortable setting by allowing patients to cast content from their mobile devices.

Galvanic isolation ensures a fail-safe separation of the headphone connector from the electrical environment near the patient's bed.

A reading light is conveniently placed under the bottom bezel of this Philips professional healthcare TV, giving patients the freedom to read - day or night. The light is operated by a button on the front touch control panel: the button illuminates when a finger or hand is near it.
